	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Local password strength analysis ● Password score (with strengths/weaknesses) ● Generate strong random passwords	**Schedule - (For V2.0+)** ● Passphrase generator for memorable combinations of words ● Batch analysis so users can evaluate multiple passwords ● More tests/larger set of test cases
Not Important	**Delegate - (Use a library)** ● Ask classmates for testing & feedback ● Have someone review the documentation of the tool on GitHub ● Ask classmates for other useful features	**Delete - (Cut it)** ● Autofill password manager that stores credentials ● Use cloud synchronization to allow data to be stored and accessed on multiple devices ● Custom AI model for password security analysis
